## PROFISIL® – A new dimension of Varnish Gel

**So protected with Profisil® Fluoride Varnish**

> Securely adhere to the tooth surface for several hours while releasing fluoride ions up to 24 hours
> Transparent and colorless after applying for optimal aesthetics
> Is not made with ethyl alcohol, with no stickiness, tackiness or grit
> Available as single dose unit incl. a brush

## VSXE® ONE – So reliably transferred

**Unique material combination for monophase impressions**

> Especially well-suited for implant impressions
> High final hardness ensures secure fixation of implant posts and primary crowns.
> Excellent flowability for outstanding accuracy of fit
> Short intraoral setting time for clinical efficiency

## PANASIL® – Precise, predictable impressions

**A wide range of choices for a wide range of indications**

> Exceptional hydrophilicity
> High tear strength
> Dimensional accuracy
> High resistance to permanent deformation

DA DENTAL ADVISOR 2025 PREFERRED PRODUCT

## IDENTIUM® – The best of both worlds

**The revolution in the one-step impression technique**

> Excellent flowability
> Exceptional hydrophilicity
> Easy removal from the mouth and model
> Odorless and neutral taste

## SILGINAT® – Anatomical Impressions

**The new standard for preliminary impressions**

> No hand mixing required
> Immediate and multiple pours
> High dimensional stability
> Low tear resistance

*Alginate Alternative*

DA DENTAL ADVISOR 2025 TOP AWARD WINNER

## FUTAR® FAMILY – Bite Registration

**Enhance your laboratory communication with the accuracy and quality of Futar® bite registrations**

> Can be conveniently milled and cut with a scalpel
> Highly thixotropic; will not run into interproximal spaces, making it easier to remove
> Also available as Clear Fast for direct visual check.
> Futar® Easy: Low dispensing force – easy to apply.
